

Score Card Scanning Instructions

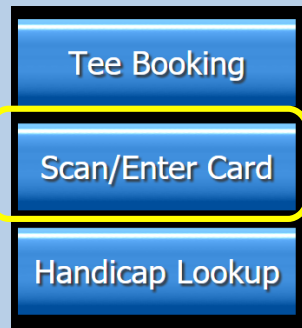

Step 1

Place your cards in the top of the scanner. It doesn't matter which way the cards are facing, the scanner is awesome enough to work out which way is correct.

YOU CAN SCAN MULTIPLE CARDS AT ONCE

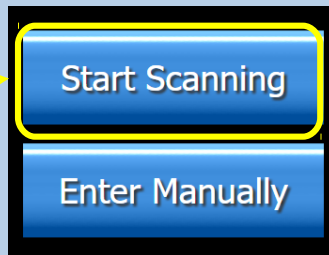

Step 2

Select the Scan/Enter Card button on the kiosk

Step 3

Select the Start Scanning Button. The scanner will read all cards loaded .

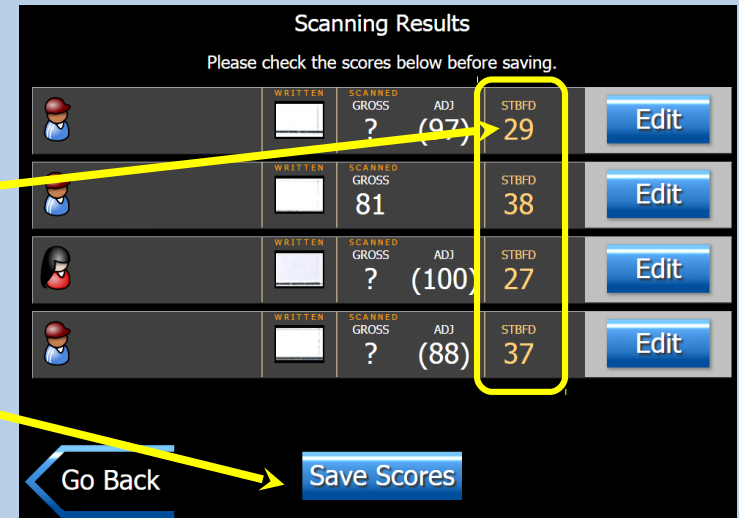

NOTE: you don't have to scan your card and you still have the option to enter a card manually.

Step 4

The score for each card is displayed on the screen. Check each score is correct.

If all scores are correct press the Save Scores button.

The ? in the Gross score column means that you have picked up on a hole.

Step 5

If any of the scores are incorrect, press the Edit button to display the scores hole by hole.

A scanned image of the card will appear next to each hole so you can see the actual score.

Correct the incorrect score by clicking on the number and typing in the correct number.
